Version History Table

Version	Date	Description
v1.0	23.11.2023	-
v1.1	02.12.2023	Special Requirements are updated according to review feedback. System interaction is added in the main success scenario. Technology and Data Variations List part is removed, as it is not required in UP format

Use Case UC11: Edit Capacity

Scope: ReserveWell Application

Level: user goal

Primary Actor: Restaurant Manager

Stakeholders and Interests

- Restaurant Manager: Wants to adapt to dynamic demand conditions, optimize operational efficiency, ensure competitiveness, and better planning workforce allocation.
- Waitstaff: Wants predictable schedules, fair distribution of shifts, and timely communication about changes to working hours to ensure a healthy work-life balance.
- Diners (Customers): Wants awareness of any changes in the restaurant's operating hours to plan their visits, accordingly, reducing inconvenience.
- Restaurant Owners: Wants accurately recorded edits. Has interest in increased reservations, cost-effective operations, adaptability to market trends, maximizing revenue, and maintaining a positive reputation.
- Development Team: Wants to ensure the reliability and stability of the system during and after capacity edits, real time updates, mobile responsiveness, and security measures to protect sensitive data.

Preconditions:

- The restaurant manager is logged into the ReserveWell Application,
- The restaurant manager has administrator authorization.
